

# ALL-ALUMINUM RAILGATE

## The RTC-Model Railgate exclusively for step vans

Working in close conjunction with fleet managers nationwide, the engineers at Tommy Gate have created an elite, lightweight railgate for commercial step vans. Corrosion resistant, low maintenance, and operator safe, the All-Aluminum, Roller Railgate applies hardened-steel rollers and dual-sealed bearings to the drive system to ensure sturdy, dependable performance through extensive cycles and in the harshest climates. With lower costs for managers and improved safety for vehicle operators, this lift is proud to run against any of the competition.
